

Blended Intensive Program (BIP)

Education for Sustainable
Development in Coastal
Communities

Do you want to learn innovative forms of environmental Education from Pan-European experts? This blended intensive mobility program will give you the opportunity to collaborate on addressing real-world examples with students from across Europe. The course is a combination of online education as well as a unique on-site component in coastal Norway including a Hurtigruten ship journey along the fjords.

The unit will enable you to execute education for sustainable development within coastal areas – specifically to prepare individuals and communities to be aware of and act upon environmental issues.

Redefine and expand your understanding through student centered teaching and challenge-based learning in a common shared academic environment both online and while experiencing Norway's spectacular landscape first-hand.

«Education for Sustainable Development in Coastal Communities» discusses principles of education for sustainable development and environmental education in response to the increasing worldwide concern on sustainable development through the sustainable development goals.

Through innovative forms of learning and teaching, including the use of online cooperation, you will be able to study real-world sustainability challenges, policies and practices affecting coastal communities, also in cooperation with local stakeholders.

MEETINGS

Online meetings: Three online meetings in April 2024.

On-site meeting in Norway: 22-26 April 2024.

5 ETCS

FUNDING

Course participants will be eligible for Erasmus+ stipend administered by their home universities.
